

Laboration 1

The signup app:

- Code an Android app that simulates a signing up process.
- Explore all the UI options offered by Android Studio.
- Add as many elements as you may need.
- Implement basic interaction to simulate successful and unsuccessful attempts to sign up.
- Make it look nice.

A more complex, older-style signup form with a brown background. At the top, it says "Sign up now" in white, with a small icon of a notepad and pencil to the right. Below this are four input fields, each with a label above it: "Email:", "Password:", "Your Intuition website name:", and "Your IntuitionHQ address:". The "Your IntuitionHQ address:" field has a pre-filled "http://" and ".intuitionhq.com" with a small input field in between. At the bottom, there is a "Terms of Use:" section with a checkbox and the text "I agree to IntuitionHQ's [Terms of Service](#).". Below this is a "SIGN UP" button.
